

CATALOGO GENERALE

DIVISIONE TERMOIDRAULICA

Profilo aziendale

Company profile

Fondata nel 1965 a Vigodarzere (PD), Elbi si è sempre contraddistinta per la varietà di gamma e la vocazione internazionale. L'azienda opera infatti da oltre 40 anni nel campo della termoidraulica, costruendo nel tempo una solida reputazione ed immagine di se stessa nei maggiori mercati mondiali.

Established in 1965 as a steel works company at Vigodarzere near Padua, Elbi has always distinguished itself for the large variety of products and its international vocation. The company has been operating for over 40 years in the field of thermohydraulics, gradually achieving a solid reputation and standing in the major world markets.

STORIA / HISTORY

Nata originariamente come produttore di bollitori e caldaie a gasolio, dopo una decina d'anni l'azienda ha concentrato le proprie attività produttive nella produzione di serbatoi per l'industria termoidraulica.

Originally established as a producer of hot water cylinders and central-heating boilers, after about a decade of activity in this field the company dedicated its efforts to the production of tanks for the thermohydraulics industry.

Verso la metà degli anni '70 Elbi avvia la produzione di autoclavi e vasi di espansione a membrana, diventando uno dei maggiori produttori europei nel settore della Termoidraulica.

In the mid 70's Elbi began producing surge tanks and diaphragm expansion tanks, becoming one of the major European manufacturers in the field of Thermohydraulics.

Ormai stretta nella sede di Vigodarzere, Nel 1981 Elbi si trasferisce nell'attuale sede di Limena, espandendo così la propria capacità produttiva.

In 1981, having overgrown the capacity of the Vigodarzere facility, the company moved to its present headquarters in Limena, thus expanding its production capacity.

Nel 1989 l'azienda intraprende una nuova strada produttiva con la lavorazione delle materie plastiche, e avvia la produzione di serbatoi in polietilene rotazionale.

In 1989 the company branched off into a new line of products, processing plastic materials and manufacturing rotational-moulded polyethylene tanks.

Nel 1990 viene fondata Elbi of America, Inc. con sede a Houston, Texas. Inizialmente svolge il ruolo di semplice attività commerciale, imparando a conoscere culture e mentalità di un paese vasto e complesso come il continente americano.

In 1990 Elbi of America, Inc. was founded in Houston, Texas. Initially the new company concentrated on simple marketing/sales activities, learning about the culture and mentality of the vast and complex American continent.

Nel 1994 nasce la divisione commerciale Green System, che si occupa della produzione e commercializzazione di vasi per piante e fiori in polietilene rotazionale. L'azienda entra così in un nuovo mercato, il giardinaggio e l'arredo verde, ampliando il proprio know-how nel campo sia tecnologico che commerciale.

In 1994 the Green System sales division was established to manufacture and market pots for plants and flowers made of rotational-moulded polyethylene. Thus the company entered the new market of gardening, which enabled it to expand its know-how both in the technological and marketing fields.

Ormai saldamente affermata nel mercato americano, Nel 1996 Elbi of America diventa ufficialmente la sede produttiva per i serbatoi a membrana fissa, avvicinando la produzione al mercato di sbocco.

Firmly established in the American market, in 1996 Elbi of America became the official manufacturing headquarters for the fixed-diaphragm tanks, thus bringing production closer to the target market.

Nel 1997 nasce la terza divisione commerciale dell'azienda, Ambiente, che progetta e produce campane e cassonetti per la raccolta dei rifiuti urbani e commercializza una vasta gamma di accessori per l'igiene e l'arredo urbani.

The company's third sales division, Environment, was established in 1997 to design and produce containers and bells for selective collection of waste, and to market a wide range of accessories for urban hygiene and decor.

Nel 2001 viene aperto un nuovo stabilimento di produzione a Modugno (BA), dedicato principalmente allo stampaggio di prodotti realizzati in polietilene rotazionale.

In 2001 a new production facility was opened at Modugno (BA), mainly dedicated to the manufacture of products made of rotational-moulded polyethylene.

L'attività Servizi per l'Ambiente avviata nel 2006 è strutturata essenzialmente come manutenzione preventiva, e avviene mediante strutture appositamente costituite (unità locali) dove vengono impiegati mezzi idonei e personale qualificato. Ogni sito manutentivo ha a disposizione una adeguata scorta di ricambi e componenti che permette di assicurare che le riparazioni vengano eseguite entro le 24 ore successive alla segnalazione.

Elbi's activity in the Environmental Services started in 2006 and are mainly focused as preventive maintenance which is performed by special purpose local units where only qualified personnel and adequate equipment are employed. Each site holds an adequate stock of spares and components, thus ensuring that all repairs can be made within 24 hours from detection.

Nel 2006 Elbi inaugura anche la divisione Parchi, e diventa distributore in Italia di strutture ludiche per l'allestimento di parchi giochi e scuole, offrendo una gamma di attrezzature per bambini dai 18 mesi ai 16 anni di età.

In 2006 Elbi also starts the Playground Division becoming the Italian distributor of a range of playground equipment for parks and schools offering a range for children within 18 months through 16 years of age.

Nel 2008 l'azienda si introduce anche nel mercato del "Benessere", e diventa distributore nel territorio nazionale dell'innovativo percorso composto da diversi attrezzi sportivi che promuovono l'esercizio fisico all'aria aperta per adulti ed anziani.

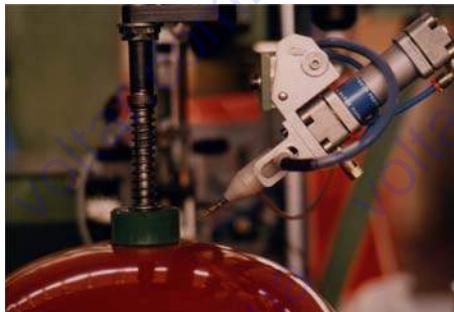

In 2008 Elbi also enters the Well-being market with fitness equipment becoming the Italian distributor of a range of an innovative "well-being track" formed by several sporting gears that facilitate the open-air physical exercise in adults and elderly people.

Nel 2008 prende forma anche la nuova business unit dedicata ai prodotti di design per il mercato dell'arredo. L'esigenza di creare un'immagine dedicata al nuovo target porta ad un restyling della tradizionale divisione Green System. Dal progetto nasce la Divisione TWENTYFIRST, differenziata in GARDENART per la collezione tradizionale di vasi garden, e LIVINGART per la collezione di complementi d'arredo per il settore living.

During 2008 a new business unit consisting of design products for the furniture market takes shape. The need to manage a new brand dedicated to such target brings to a restyling of the traditional Green System Division, thus giving life to the TWENTYFIRST Division, distinguished in GARDENART for the traditional collection of garden pots, and LIVINGART for the collection of furnishing accessories for the living market.

Reparto montaggio / Assembling department

TECNOLOGIE / TECHNOLOGIES

Attivo dal 1981, lo stabilimento di Limena è suddiviso in diverse aree produttive, ognuna specializzata in lavorazioni specifiche.

Operational since 1981, the Limena plant is split into different production areas, each one specialized in a specific type of manufacturing.

MECCANICA / MECHANICS

La trasformazione dei metalli costituisce attualmente circa il 70% delle attività produttive, e impiega tecnologie di: stampaggio, taglio e piegatura lamiere; saldatura di acciai al carbonio e acciai inossidabili; verniciatura a polveri epossidiche, e assemblaggi. L'intero processo produttivo viene realizzato con largo impiego di automazione industriale e robot per la manipolazione e movimentazione dei manufatti.

L'organizzazione della produzione è monitorata da un sistema informativo aziendale integrato, partendo dall'analisi e programmazione della produzione fino alla vendita del prodotto finito. A supporto di tale struttura informativa opera inoltre il nostro Servizio Elaborazione Dati, il quale soddisfa le particolari esigenze informative implementando e sviluppando ad hoc parte del software.

The transformation of metals currently covers about 70% of our production activities, with the use of different technologies, from cold pressing, cutting and bending of plate to welding of carbon and stainless steel, epoxy powder coating and assembly. The entire production process makes large use of industrial automation and robotic systems for manipulation and logistics.

An integrated company information system monitors the organization of the production process, starting from production analysis and programming up to sales of finished products. This information structure is supported by our Data Processing Service, which satisfies special information requirements by implementing and developing in-house part of the software for specific purposes.

MATERIE PLASTICHE / PLASTIC MATERIALS

Nei primi anni '90 Elbi ha voluto intraprendere una nuova strada produttiva con la lavorazione delle materie plastiche, ottenendo notevoli risultati in termini di innovazione tecnologica. Dal 1996 Elbi è diventata membro di ARM (Association of Rotational Molders), un'associazione internazionale di categoria che rappresenta i suoi soci costituiti da aziende rotostampatrici e professionisti dell'industria provenienti da 66 nazioni.

In the early 90's Elbi decided to expand into a new line of production with the manufacture of plastic materials, obtaining remarkable results in terms of technological innovation. In 1996 Elbi became a member of ARM (Association of Rotational Moulders), an international trade organization that gathers rotational moulders and industry professionals from 66 countries worldwide.

Reparto saldatura / Welding department

Forno per il trattamento di smaltatura interna / Oven for the glass lining treatment

Il reparto plastica è dotato di 9 forni per lo stampaggio rotazionale, 7 in sede centrale e 2 presso lo stabilimento di Modugno (Bari). Il forno maggiore è in grado di stampare prodotti fino ad una capacità di 15.000 litri, ed è tra i più grandi in Europa.

Mediante la tecnologia dello stampaggio rotazionale Elbi realizza una vasta gamma di prodotti in polietilene atossico e riciclabile: oltre a serbatoi di prima raccolta (acqua, liquidi alimentari, chimici e altri tipi di fluidi). Elbi progetta e produce complementi d'arredo di design, vasi per piante e fiori, cuccie per cani e gatti, campane per la raccolta differenziata, cassonetti per i rifiuti solidi urbani e contenitori per il compostaggio dei rifiuti organici, contribuendo alla riduzione dell'inquinamento ambientale.

The plastics department is equipped with 9 rotational moulding oven-machines, 7 at the central plant and 2 at the new Modugno (Bari) plant. The biggest machine, which is one of the largest of its kind in Europe, has a moulding capacity of 15,000 litres.

Thanks to the rotational moulding technology Elbi manufactures a wide range of non-toxic recyclable polyethylene products: in addition to storage tanks (water, food industry and chemical liquids as well as other types of fluids). Elbi designs and manufactures design furnishing objects, pots for plants and flowers, doghouses bell receptacles for sorted waste disposal, dumpsters for solid urban waste and composters for organic waste conversion, thus contributing to the reduction of environmental pollution.

GOMMA / RUBBER

Alla fine dell'anno 2000 Elbi ha assorbito una consociata che produceva le membrane in gomma utilizzate nei vasi di espansione e nelle autoclavi a membrana Elbi. L'acquisizione si è completata nel 2001 con il trasferimento nella sede di Limena di tutte le attrezzature per la produzione di membrane.

Tali impianti comprendono due mescolatori chiusi per la produzione di mescole di diversi tipi di gomma, una gamma di presse moderne, tutte a iniezione, e un laboratorio prove dove si effettuano i test sulle mescole richiesti dagli enti di certificazione per la verifica di conformità secondo le più rigide norme internazionali. Tutte le fasi del ciclo produttivo, a partire dalla progettazione delle mescole allo stampaggio del prodotto finito, sono realizzate internamente e monitorate in continuazione dal servizio di controllo qualità interno.

At the end of the year 2000 Elbi absorbed an affiliate that produced the rubber diaphragms used in the Elbi expansion and surge tanks. The acquisition was completed in 2001 with the transfer to the Limena facilities of all the diaphragm production equipment, including two closed-cylinder mixers for production of different types of rubber compounds, a range of modern injection presses and a test laboratory where the compounds are tested as required by the certification authorities to verify compliance with the most stringent international standards.

All the stages of the production cycle, from the design of the rubber compounds to the moulding of the finished products, are carried out in-house and continuously monitored by our quality control service.

Impianto di estrusione e polverizzazione del polietilene presso lo stabilimento di Modugno (BA) / Polyethylene extrusion & pulverization system at the Modugno (BA) plant.
